Surprising Fact

I've Owned
Race Horses

What do you like most about working at Peak?

I like the people I get to work with, solving the challenges that come with servicing our clients, **Peak's DO THE RIGHT THING approach** and the collaborative atmosphere.

What do you enjoy most about being on PEAK's Sales Team?

I like being on the front-end solving problems and challenges.

What is the best professional advice you received so far?

Find your own doors. They're not always easily seen.

If you weren't in Construction, what would you do?

I would be in the finance industry.

Three words to Describe Yourself.

Fun. Outgoing. Determined

What has been your favorite project to date?

Riddell's North Ridgeville Ohio project is my favorite. It was a complex project - not a traditional warehouse in that it combined several services, incorporated a large distribution effort and office space, requiring EPA and regulatory agency involvement.

Has your degree in Renewable Energy been helpful in the construction industry?

My degree is helpful in that the same construction project principals I learned in school apply to our commercial projects today. As we move towards more LEED and green-centered applications, I believe my degree will become more useful.

Where do you see yourself in 5 years?

Hopefully, being very successful in the industry with my own team and expanding PEAK into new markets.

Biggest Weakness.

Comprehending that there's only 24 hours in a day.
