

Get to Know The PEAK Team...

Steve Golumbeck, Vice President

What do you like most about working at Peak?

The culture, specifically how family oriented it is. The team we have at Peak cares for each other and it shows in the day to day interaction. We have many differing opinions but there is always respect between us and that makes it fun for me.

What is the best professional advice you received so far?

Choose the right boss. The right boss will make your life and career so much better.

If you weren't in Construction, what would you do?

Rebuild 1960's-70's muscle cars. I am not sure I would be very good at it but I love cars and think it would be a fun process with an end result that is tangible.

What are your words to live by?

"...the biggest problem you and I have to deal with is choosing the right thoughts." Dale Carnegie. If I choose to be optimistic in my thoughts, I have found it makes my life much more positive.

What has been your favorite project to date?

I have been blessed to be involved in many great projects. It is hard to choose one.

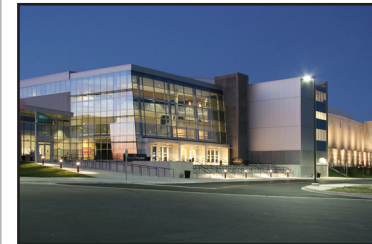

A couple I am really proud of are the Sears Centre Arena in Hoffman Estates, IL, Wirtz Beverage Office/Warehouse in Cicero, IL, IDI Building A in Antioch, IL and H&M BTS in Burlington, NJ.
