

LET'S BUILD SOMETHING

COOL TOGETHER.

CONTROLLED ENVIRONMENT SOLUTIONS THAT DELIVER

EXPERTISE BUILT ON SPECIALIZED EXPERIENCE

Peak Construction is proud to offer a full range of freezer / cooler, and cold storage facility solutions—from temperature controlled manufacturing spaces to high-performance distribution hubs. Our design build approach combines speed, scalability, and proven project delivery across the country.

Whether upgrading an existing facility or building new from the ground up, we bring hands-on leadership, deep food and beverage experience, and a track record of delivering value at every stage.

WHY BUILD WITH PEAK?

- **END-TO-END PARTNERSHIP:** From site selection and permitting to design, construction, and turnover, we simplify the entire process.
- **COLD STORAGE EXPERTISE:** We understand cold-chain design standards, compliance standards, and specialized systems like CO2 and ammonia refrigeration.
- **SPEED-TO-MARKET DELIVERY:** Our lean, proactive approach minimizes delays and maximizes your operational readiness.
- **PROVEN RESULTS:** We've built for top-tier food, beverage, and logistics brands across the country.
- **SAFETY & QUALITY:** We diligently implement our rigorous quality and safety programs throughout the entire process.
- **DO-THE-RIGHT-THING APPROACH:** Our culture is built on honesty, accountability, and always putting the client's best interests first.
